**54 Sqft.**

Material : **Galvanized Steel** | Door Skin : **Powder Coating** | Stability : **Heavy Duty**

## ALUMINIUM WINDOWS

There are several types of aluminium windows available, each with its own unique features and benefits. Here are some common types of aluminium windows in Section 18X40, 18X60 and Domal Section.

**Casement Windows:** These windows are hinged on one side and open outward like a door. They are known for excellent ventilation and a modern, sleek look.

**Sliding Windows:** Sliding windows have one or more sashes that slide horizontally within the frame. They are easy to operate and provide a contemporary appearance.

**Awning Windows:** Awning windows are hinged at the top and open outward from the bottom. They are great for ventilation while providing protection from rain.

**Double-Hung Windows:** Double-hung windows consist of two sashes that slide vertically within the frame. Both the upper and lower sashes can be opened, allowing for better control of airflow.

**Louvered Windows:** Louvered windows have multiple horizontal glass slats that can be angled to control the amount of airflow and sunlight entering the room.

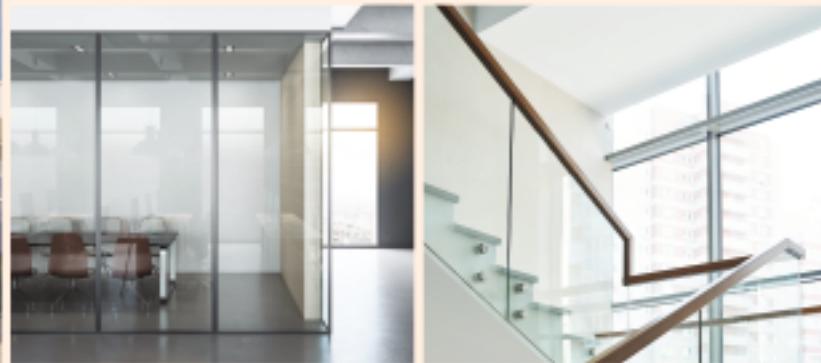

**Custom Windows:** Custom aluminium windows can be designed to fit unique architectural styles and specific preferences, allowing for a personalized look and functionality.

The choice of aluminium window type depends on factors like your aesthetic preferences, the desired level of ventilation, energy efficiency, and the architectural design of your space.

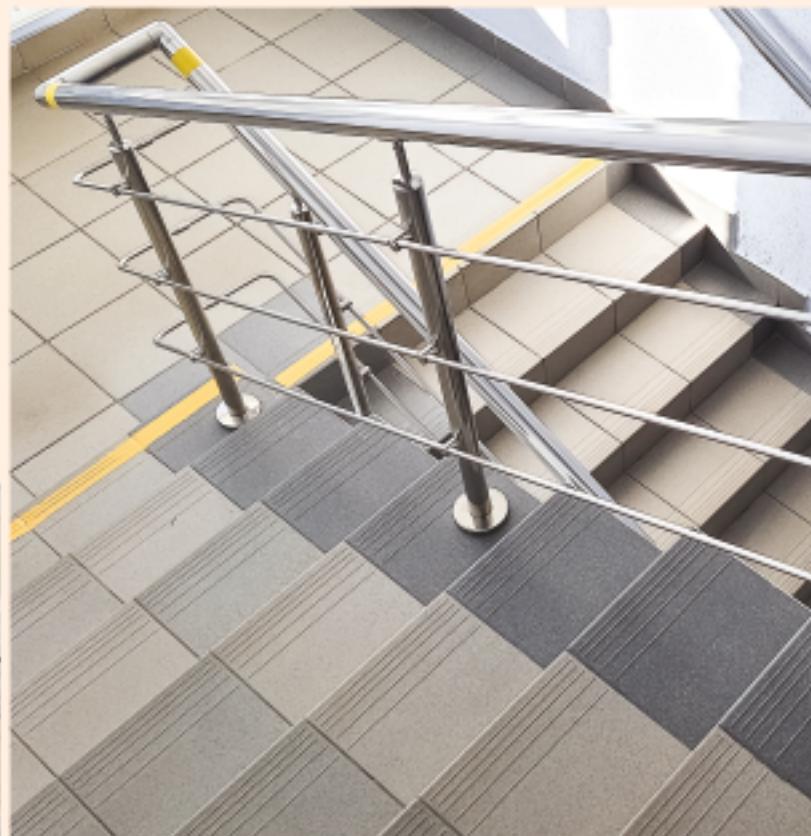

## ALL TYPES OF TOUGHENED GLASS WORK

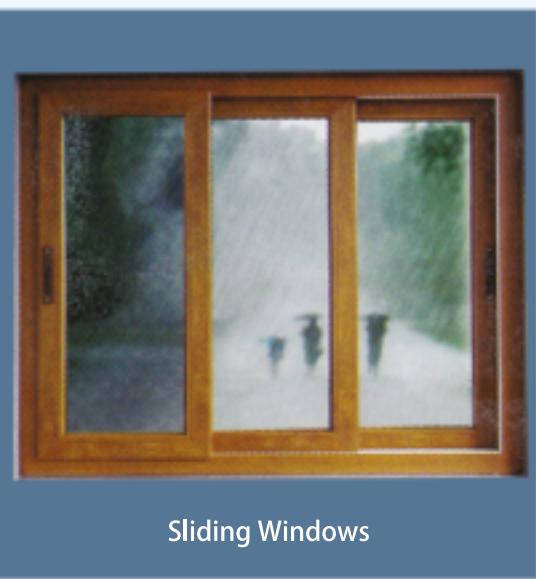

"We offer a comprehensive range of toughened glass services, catering to all types of glass work requirements. Whether you need toughened glass for residential, commercial, or specialized applications, our expertise ensures quality solutions that meet your needs."

## STAINLESS STEEL (S.S.) RAILING SOLUTIONS

"We specialize in Stainless Steel (S.S.) Railing solutions. Our expert craftsmanship ensures the installation of high-quality stainless steel railings that not only provide safety and functionality but also enhance the aesthetic appeal of your space."
